Slope Specialist Contractor | Geotechnical & Remedial Works

Company Overview

Specialist geotechnical, foundation and slope remedial construction contractor

Background

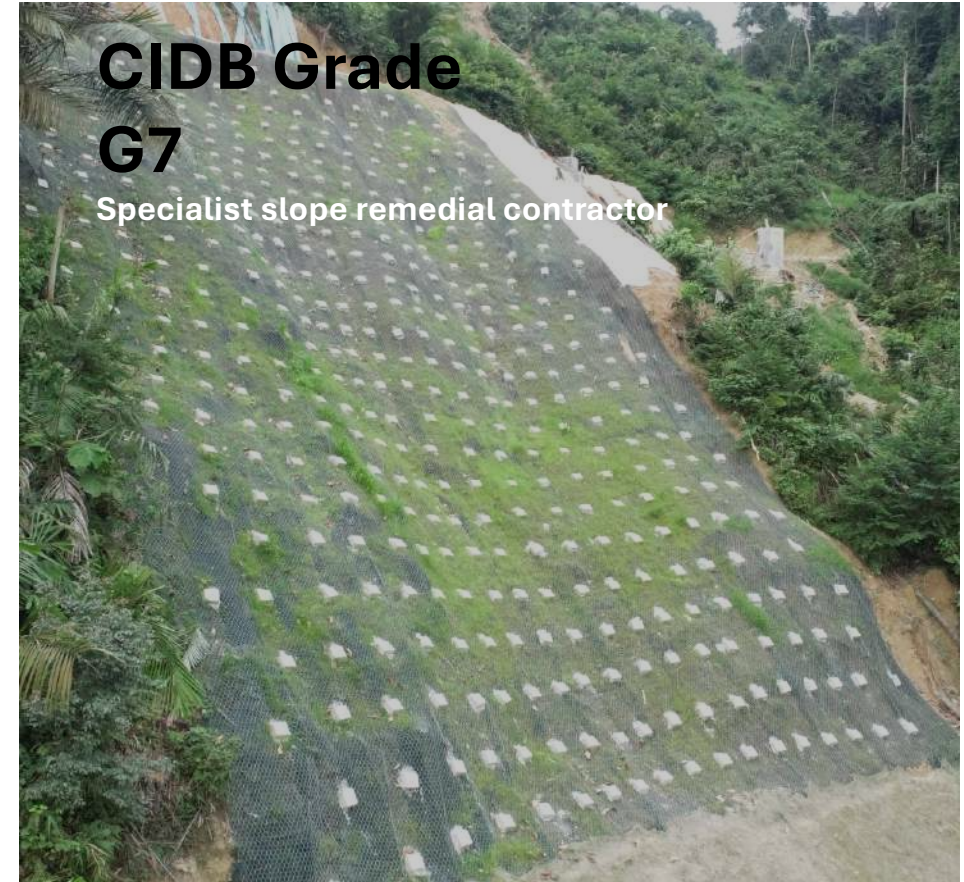

Uji Teguh R. Sdn. Bhd. was established on 26 June 2010 to offer specialist geotechnical and foundation engineering works. The company is registered with CIDB Grade G7 and multiple government and private-sector vendor platforms.

Core Focus

Slope stabilisation, remediation and riverbank works, monitoring works, maintenance cleaning works and related construction services.

Market Position

Equipped with internal capability, experienced project teams and owned equipment to compete in specialist construction works.

Slope Stabilisation / Remediation

- Proposed slope stabilisation design
- Soil nailing
- Gunite / shotcrete works
- Erosion protection mat
- Steelgrid netting
- Horizontal drain
- Retaining wall systems

Construction & Protection Works

- Rockfill and stone pitching
- Closed turving and hydroseeding
- Rockfall fencing and netting
- Micropile
- Drainage system
- Maintenance cleaning works
- Monitoring work

Vision & Mission

Vision

To be a thriving and competitive construction company that explores new opportunities and delivers solutions aligned with client needs and satisfaction.

Mission

To build a recognised construction company through professional development, strong execution and continuous improvement to achieve high levels of client satisfaction.

Quality Policy Statement

Quality, safety and consistent project delivery

Quality Commitment

Uji Teguh R. Sdn. Bhd. is committed to completing projects to a consistently high standard. The quality management approach supports defect-free delivery, compliance and continual improvement across the company's business processes.

- Provide services that exceed client expectations
- Use reputable and high-quality products
- Engage qualified and properly resourced teams and subcontractors
- Maintain a safe working environment for staff and visitors
- Comply with standards and legislative requirements
- Continually review and improve the quality management system

ISO-aligned quality management culture

Organisation Structure

Driven by Expertise. Built on Collaboration.

Our Clients

Project Portfolio Summary

Slope Protection Works

58 completed projects
Core portfolio covering slope remedial, tower foundation stabiliser, drainage, rockfall and geohazard works.

Maintenance Cleaning Works

7 completed projects
Public area, building maintenance and PETRONAS Gas facility-related maintenance records.

Aircond / Other Services

11 completed projects
Air-conditioning maintenance, monitoring and other supply/services retained from the original profile.

Project In Progress

2 active projects
Current slope protection and geohazard/geotechnical repair works.

76

total completed project entries retained
