Introduction of **TURCOMP ENGINEERING SERVICES SDN. BHD.**

WHO WE ARE

13 offices- including pontian (new) 4 workshops: JB, SA, bintulu, miri Warehouse: KSB, ASB

- Established in **year 1992** in Labuan.
- **TURCOMP** denotes **TUR**bine & **COMP**ressor, which was the initial business specialised in providing maintenance services of rotating equipment for the process and power plants in the vicinity of Labuan.
- Awarded status of *preferred vendor for year 1996-2006 in Petronas Vendor Development Programme (VDP) for Rotating Equipment Inspection during Plant Turnaround.*
- Today, Turcomp operates from 11 service centres and 6 local offices situated mostly on major industrial areas accross Malaysia. These service centres are equipped with offices, workshop, warehouse and fabrication facilities offering full range of engineering support services.
- We focus on these 2 areas of expertise,

Plant Turnaround and Maintenance Services

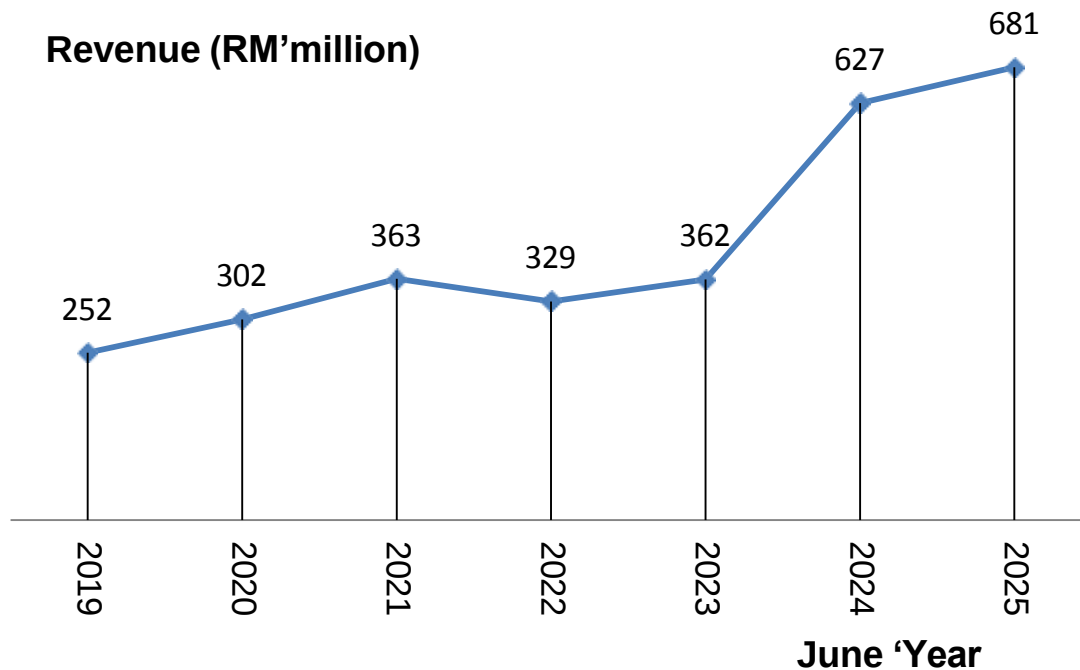

Industrial Equipment and Automation Solutions

predominantly for Oil & Gas & Power Generation industries

OUR SERVICES

Construction & Civil Works

- ***Construction of commercial, industrial, institutional and residential buildings*** including structural concrete works, reinforced concrete, steel structures, masonry, roofing, architectural finishes and external works.
- Site preparation, earthworks, excavation, foundation works, roadworks, drainage systems, retaining structures, utility installation, demolition, refurbishment, renovation and building extension works.
- Project management, construction supervision, quality assurance, safety compliance and coordination of multidisciplinary construction activities from planning through project completion.

Infrastructure Construction

- ***Construction and upgrading of infrastructure works*** including roads, pavements, drainage systems, sewerage networks, water reticulation, utility services and associated civil engineering works.
- Installation of underground utilities, culverts, retaining walls, stormwater management systems, hardscape works and site development for industrial, commercial and public infrastructure projects.
- Design coordination, construction, testing and commissioning of infrastructure facilities in accordance with statutory requirements and client specifications.

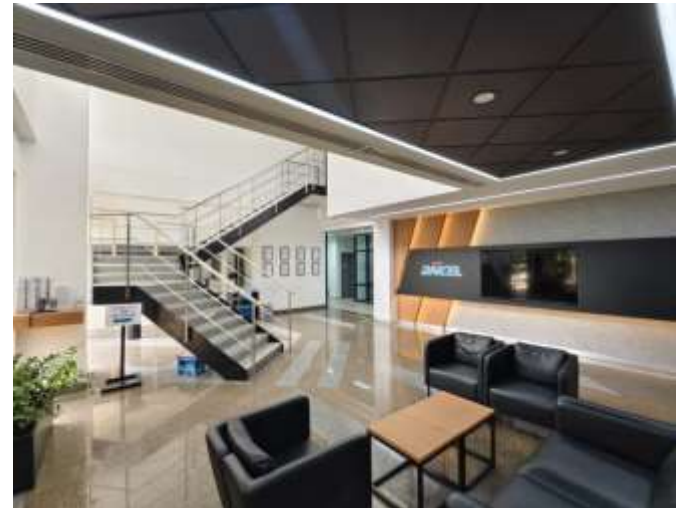

Interior Design & Fit-Out Works

- ***Interior design, space planning and fit-out works*** for commercial, industrial, institutional and residential developments.
- Supply and installation of ceilings, partitions, flooring, wall finishes, doors, cabinetry, furniture, lighting, decorative finishes and other interior architectural components.
- Renovation, refurbishment and interior upgrading works, including coordination with mechanical, electrical and plumbing (MEP) services to achieve functional and aesthetically designed spaces.

Design & Build Services

- ***Provision of integrated Design and Build solutions*** encompassing architectural, civil and structural, mechanical and electrical engineering, project management and construction services.
- Comprehensive project execution from conceptual design, authority submissions and approvals, procurement, construction, testing and commissioning through to project handover.
- Delivery of cost-effective and sustainable construction solutions while maintaining compliance with client requirements, statutory regulations and industry standards.

Mechanical Maintenance

- ***In-site services and maintenance of rotating equipment*** i.e. compressors, pumps, gas turbines, steam turbines, fans and turbo-expanders and material handling.
- Reverse engineering casting products, specialised coatings for mechanical parts, maintenance of air intake, exhaust system and chimney stack.

DOSH Equipment Maintenance

- We are ***one of the DOSH certified repairers*** in Malaysia who are specialised in ***inspection, repair, testing and refurbishment for boilers, furnaces, reformers as well as unfired pressure vessels.***

Oilfield Services

- ***Repair, maintenance and refurbishment services*** of Christmas tree, chokes, subsurface safety relief valves, actuators and other ancillary equipment.
- ***Assembly and testing of various Well Control Equipment*** i.e. valves, chokes, Christmas Tree, C/K Manifold, Control Panel & B.O.P.'s.
- ***Service and repair of choke control console***

Control and Instrumentation

- ***Replacement*** of instruments, devices, components and complete system upgrade.
- ***Troubleshooting, repairing, construction and maintenance*** of instrumentation system.

Operation Excellence

- ***Plant Operation Management*** focusing on set of best practice systems such as Management, Operation and Safe working practices.
- ***Plant Turnaround Management*** using a structured process approach that defines how a plant TA should be managed in ensuring TA schedule, budget, quality and safety objectives are achieved.

Corrosion Engineering

- ***Preservation and maintenance of assets*** to greatly reduce the economic impact of corrosion that leads to costly and time consuming repair works.
- Not only preserve the assets from wearing out prematurely but ***extends the operating life span***.

Pre-Commissioning

- *Flange management* and *controlled bolt tightening*.
- *Hydro Testing, Chemical Cleaning, Hot Oil Flushing, Nitrogen / Helium Leak Detection Services.*

Plant Engineering & Construction

- Turnkey solutions for the *plants construction*.
- Scope of work includes *civil / structural, mechanical, and ECNI design, engineering, procurement and construction.*

Assembly Centre

- **Overhead crane** building structured
- **Valve assembly & actuation**
- **High torque pneumatics** bolt tensioning
- **Compressed instrument air and dryer.**

On/Off & Control Valve Testing

- **Semi-auto** programmed testing bench
- **High pressure hydrostatic** shell test up to 700 Barg
- **Low & high pressure air/gas** closure test
- **Range – ½" to 12" from ANSI 150 to ANSI 2500**
- **Auto clamping** system
- **Leak rate monitoring** and **Real time reporting**

Enclosed Testing Rig

- Testing pressure range up to **20,000 Psi (1,361 Barg)**
- **Various sizes of testing flanges**, from FF, RF, RTJ to spool flanges
- **Functional / Stroking** test.

Quality Inspection

- **Non-destructive test** such as Dye-penetrant test, painting hardness test, UT, MT, RT, etc.
- **QA/QC** is certified by SNT-TC1A with ASNT standard procedure.

Quality Inspection

- **Visual Inspection** with calibrated measuring tools and equipment.
- **Positive Material Identification** include X-ray fluorescence (XRF) and optical emission spectrometry (OES).

Equipment Calibration / Diagnostic

- **Asset Management Software** for setting, configuration & calibration.
- Offline Testing **such as signature test, steady & dynamic loop test, multipoint response test, etc**

Product & Services Training

- Provision of **product classroom, hands-on training, demo cum exhibition** to client.
- Flow control school for **valve sizing, actuator selection, SIL calculation** by OEM software.

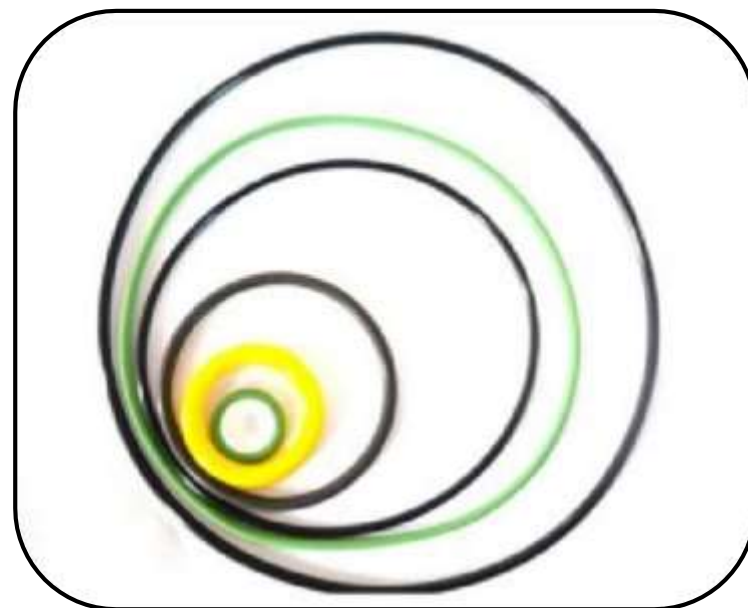

Valve Refurbishment & Repair

- Leading by **PROSEAL Group**, an integrated **valve repair center** that provides quality service, spare parts, and repairing & testing facilities under one roof.
- Our in-house expertise includes **surface coating/build-up, ball spherical grinding & design/modification of cylinders**. We also specialize in tailor-made seal kit valve seats & engineering plastic.

Specialist in Valve And Actuator Seal Kit & Component

- Supply of custom-made seal & moulded seal
- Proseal product are mostly cater to **oil & gas, power plant, and chemical industry**

Valve Reverse Engineering / Improvement

- Supersede the **'old' parts now obsolete** from the OEM and produce **high quality 'new' parts** which match the original specifications plus the customer's requirements.
- **Post-Mortem Analysis** on problematic valve and upgrade valve construction and material to meet higher expectation.

Inventory Management Program

- Monitoring **install base** and **service contract / price agreement** with **stock controlling system**.
- **Inventory Optimization** for the right amount of spares for both vendor and end client.

Corridor Project Erection of Piperacks

72

Client	Petronas Chemicals Methanol (Labuan)
Year	2009 ~ 2010
Value	RM14,850,000 (USD\$ 3.62mil)

Conveyor Structure Restoration Works

73

Site	Sultan Salahuddin Abdul Aziz Power Station, Kapar
Client	Kapar Energy Venture
Year	2010 ~ 2010
Value	RM17,300,000 (USD\$ 4.22mil)

Fire incident burnt down the crucial GF3 conveyor structure for coal handling.

Restoration completed.

Relocation of Gas Turbine Generating Sets

74

Site	Langkawi to Tawau
Client	TNB Remaco
Year	2011 ~ 2014
Value	RM60,300,000 (USD\$ 14.72mil)

*before
relocation*

*after
relocation*

*Relocation of 2 x 32 MW
Frame 6 Gas Turbine
Generating Sets &
Balance of Plant from
Teluk Ewa, Langkawi
to Tawau Main Intake,
Tawau, Sabah.*

Fuel Gas Compressor Skid

75

Project	FPSO Cendor
Client	Malaysia Marine and Heavy Engineering
Year	2011 ~ 2014
Value	RM14,200,000 (USD\$ 3.47mil)

Supply of On-Off Butterfly / Ball Valve
